

CARBON FOOTPRINT POLICY OF BECHA S.A.

The company has decided to implement a Management System based on the ISO 14064-1 standard to improve performance and efficiency with the environment, energy and the fight against climate change.

The Presidency of **BECHA S.A.** approaches the system as a way to quantify and reduce GHG emissions and comply with legal requirements through continuous improvement of the system's effectiveness. To this end, **BECHA S.A.'s** management system is based on the following:

- ☑ Complying with applicable environmental legislation and regulations, as well as other requirements to which our company subscribes related to its GHG emissions.
- ☑ Promote an efficient use of available natural resources.
- ☑ Continually intensify our environmental management to achieve improvements in the company's overall performance, with a focus on carbon neutrality.
- ☑ Establish and regularly review environmental and energy objectives and targets in line with the commitments made in this statement. For the effective implementation of these principles, the support of both the management team and the workforce is absolutely necessary.
- ☑ Identify and reduce the organization's GHG emissions, taking into account the limits of the system.
- ☑ To train and sensitize the organization's personnel with respect to environmental performance, as well as to provide the necessary resources for the proper functioning of the management system.

BECHA S.A. will maintain a systematic approach for the identification of training needs and its planning, aimed at guaranteeing the compliance of our personnel with this Policy.

The Presidency will periodically review this Policy in order to develop the concept of continuous improvement in environmental and energy matters, thus ensuring that it is kept up to date.
